- member National Tour Association since 1984
- co-owner Travel Alliance Partners

"Motorcoaches reduce congestion and pollution by taking more than 425 million cars off the road each year."

- American Bus Association

Save a Penguin ~ Take a Motorcoach

The habitats of several species of penguins are endangered by carbon dioxide emissions. You can do your part in helping to stop their habitats from melting away. *Take a group tour!*

Motorcoaches are the most fuel-efficient and least energy intensive mode of commercial passenger transportation*

- ◆ Motorcoaches = 184 passenger mpg
- ◆ Single-occupant automobiles = 28 passenger mpg
- ◆ Carbon dioxide emissions are reduced by an average of 85% per passenger mile for every person who chooses motorcoach travel over driving alone*

Motorcoaches are the greenest travel mode by virtue of drastically lower carbon emissions compared to airlines, trains, and personal automobile, according to several studies*

Plus...

Motorcoach travel provides safety, comfort and convenience in a spacious environment featuring roomy seats, ample leg room, video monitors and onboard lavatory.

- ◆ travel with people who have similar interests
- ◆ learn about places & cultures
- ◆ enjoy the cost-savings of group travel
- ◆ minimize uncertainty, and enjoy the pampering of a hosted vacation
